Safe harbor statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

Agenda

Oracle Engineered Systems:
integrated, full-stack solutions

Oracle Cloud Infrastructure:
A complete platform for every workload

Oracle Engineered Systems – The Family

Oracle Exadata
Database Machine

Oracle Database
Appliance

Oracle Zero Data Loss
Recovery Appliance

Oracle Private
Cloud Appliance

Exadata Vision

Extreme Performance and Availability, Lowest Cost, Available Everywhere

Ideal Database Hardware

Scale-out, database optimized compute, networking, and storage

Database Aware System Software

Unique algorithms vastly improve OLTP, Analytics, and Consolidation

Automated Management

Fully automated and optimized end-to-end

Available

On Premises

Cloud@Customer

Oracle Cloud

Exadata X9M: Extreme Performance Scale-out Database Platform

- **Scale-Out 2 Socket Database Servers**
 - Latest 32-core Intel Ice Lake CPUs
 - Up to 2TB Memory
 - 8-socket database server for SMP workload
- **Ultra-fast 100Gb/s RDMA over Converged Ethernet (RoCE) Internal Fabric**
- **Scale-Out *intelligent* 2-Socket Storage Servers**
 - Latest 16-core Intel Ice Lake CPUs
 - 1.5 TB Persistent Memory per storage server
 - Three tiers of storage: PMem, NVMe Flash, HDD

Each rack has up to...

<u>Compute Capacity</u>	<u>Storage Capacity</u>
1,216 DB Cores	576 Storage Cores
38 TB Memory	27 TB PMem
	920 TB NVMe Flash
	3.8 PB Raw Disk

Exadata Smart System Software Highlights

Fastest OLTP

- **Fastest OLTP I/O** with scale-out storage, RDMA, Persistent Memory, and NVMe flash
- **Fastest scale-out** with unique RDMA algorithms for inter-node cluster coordination
- **Fastest recovery** from failed or sick components

Fastest Analytics

- **Unique Smart Scan** automatically offloads data intensive SQL operations to storage
- **Unique Smart Flash Cache and Storage Index** automatically accelerate database I/O
- **Unique Columnarization** automatically converts data to fast In-Memory Columnar format in flash

Best Consolidation

- **Unique Prioritization** of latency sensitive or important workloads through full stack
- **Unique Workload Isolation** of multiple tenants or workloads through full stack

Extreme Performance and Consolidation

Reduce Costs by Doing More

- Deploy more Databases
 - Process more Data
 - Support more Users
 - Consolidate more Workloads
 - Complete more Transactions
 - Perform more Analysis
- ... than on any other platform,
including DIY custom configurations

Less hardware, software and data center infrastructure spend

“The unique Exadata software that accelerates the Oracle Database by as much as an order of magnitude means less hardware is required to achieve the same database objectives.”

Marc Staimer
Dragon Slayer Consulting

Oracle Database Appliance X9 Model Family

HIGHER

PERFORMANCE

What's New?

- Latest Intel Xeon processor technology
- Increased storage capacity
- 33% more capacity and faster RAM

Oracle Database Appliance X9-2S

Single-instance

16 Cores

256 GB Memory, expandable to 512 GB

Up to 3x Public Network Cards

13.6 TB Data Storage (Raw)

Oracle Database Appliance X9-2L

Single-instance

32 Cores

512 GB Memory, expandable to 1 TB

Up to 3x Public Network Cards

13.6 TB Data Storage,
expandable up to 81.6 TB (Raw)

Oracle Database Appliance X9-2-HA

Single-instance and RAC

64 Cores

1 TB GB Memory, expandable to 2 TB

Up to 3x Public Network Cards per Server

46 TB SSD Data Storage, expandable up to
368 TB SSD or up to 92 TB SSD / 648 TB HDD (Raw)

CAPACITY

HIGHER

Recovery Appliance Overview

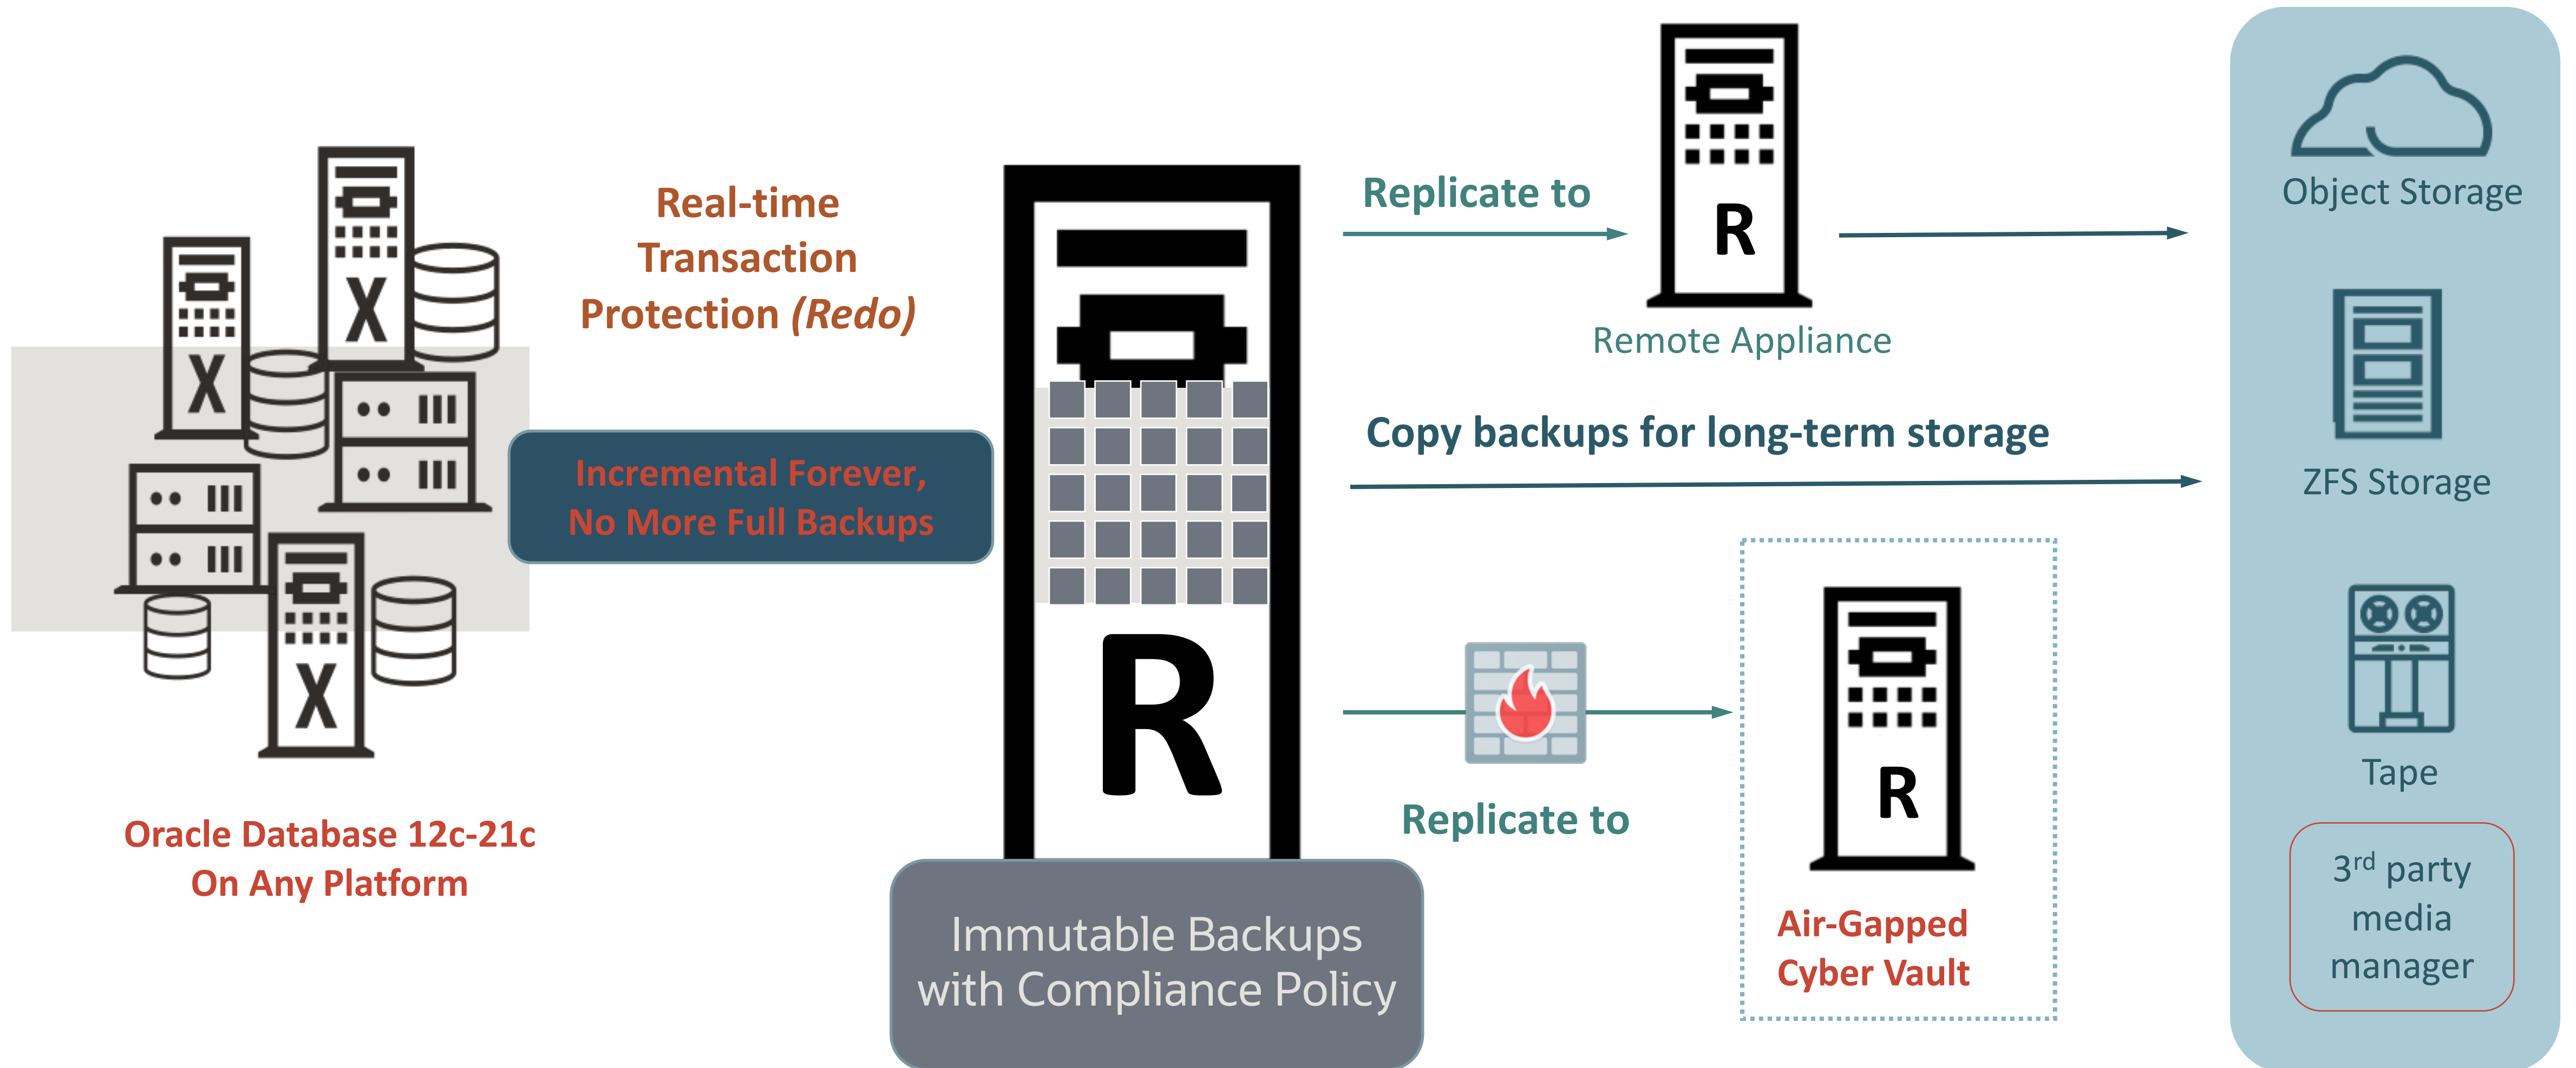

2000+ PB Protected Databases

Leading Financial Services, Semiconductor, Insurance, Utilities
Transportation, Manufacturing, and Government organizations

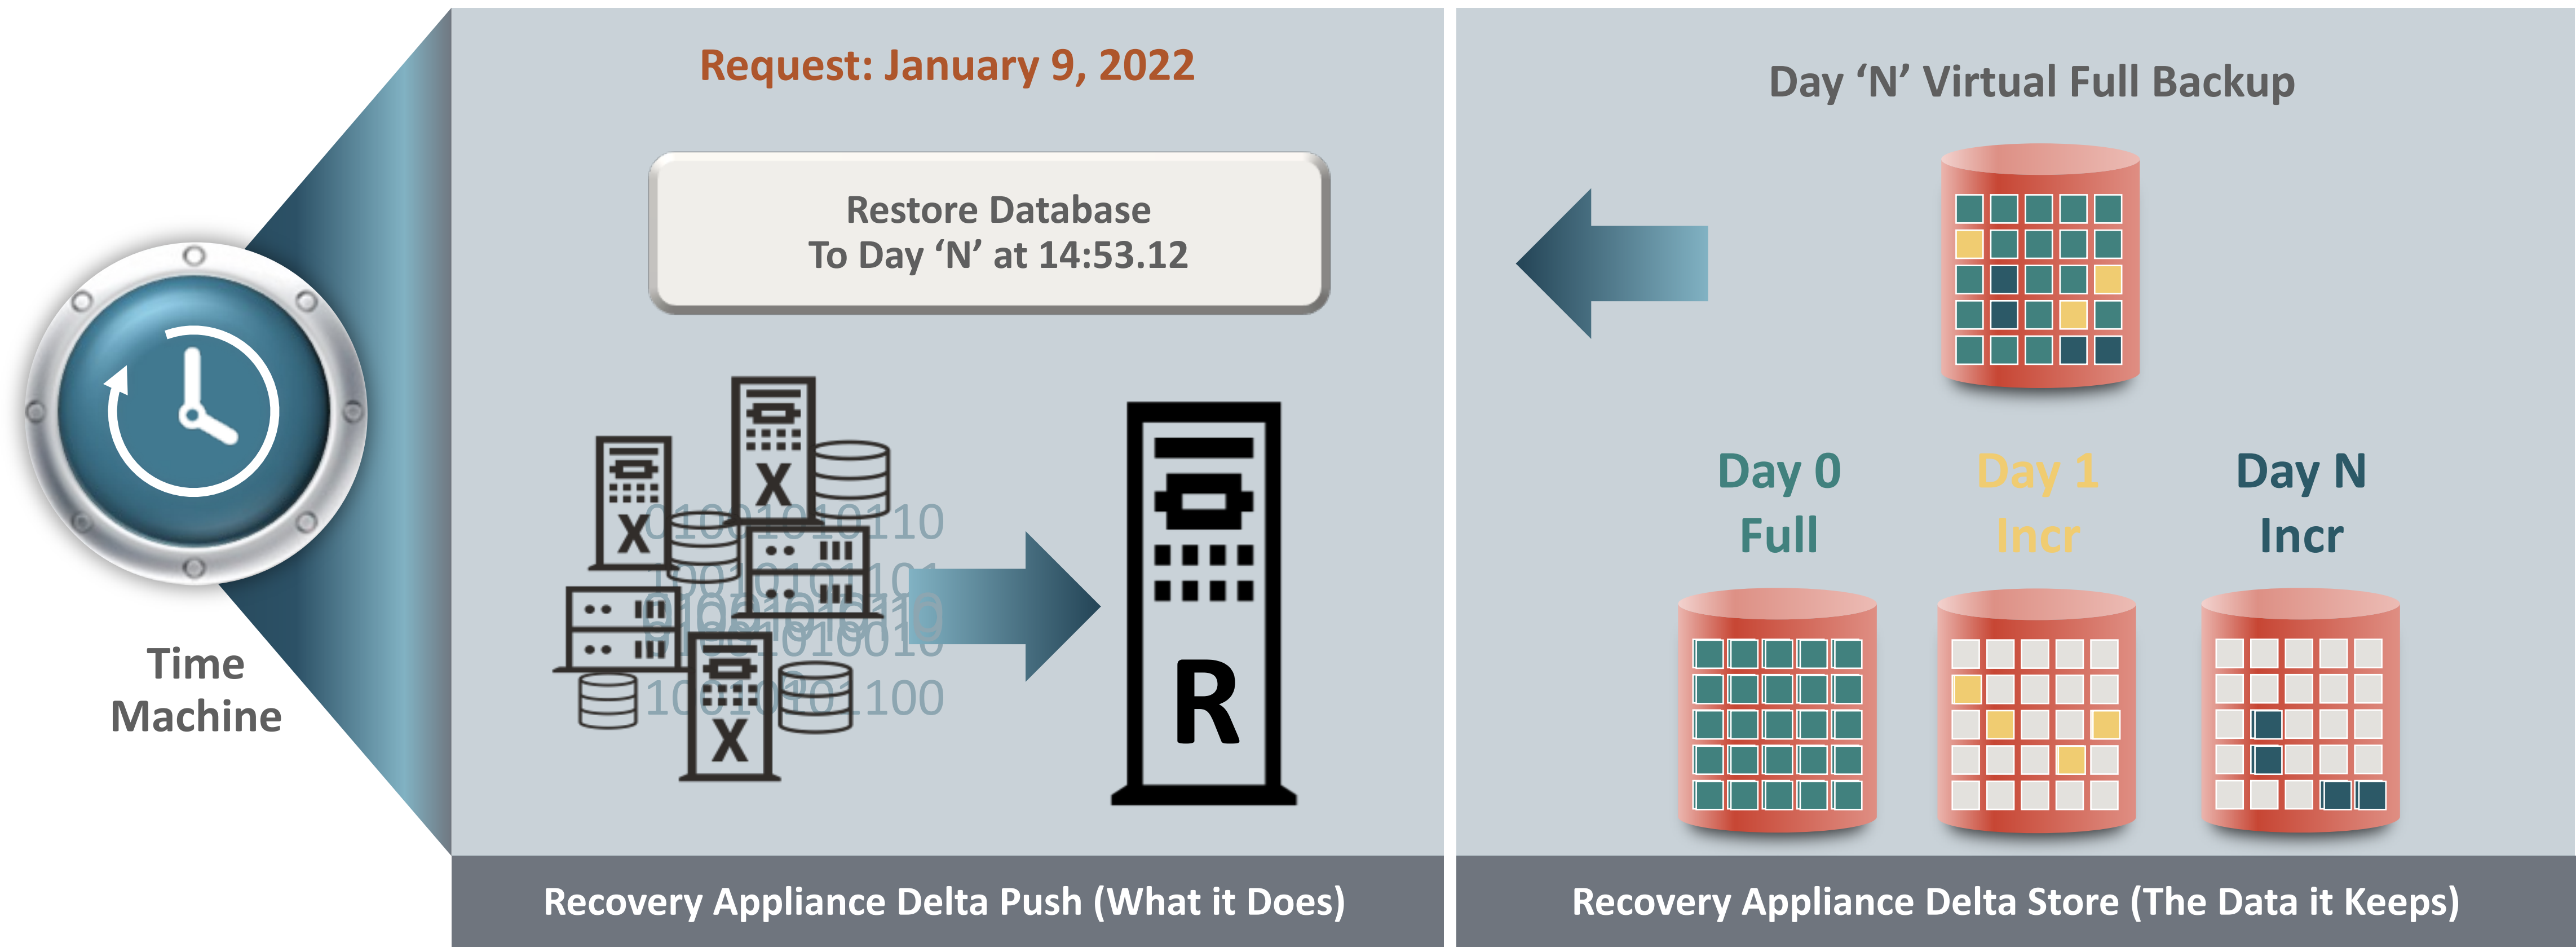

Recovery Appliance X9M

Continuous data protection and multi-tiered backup addressing compliance requirements

Recovery Appliance X9M

Minimal impact incremental forever backup with virtual full restore

Private Cloud Appliance X9: Optimized Modern infrastructure

Optimized for Performance – 33% more cores/server

Optimized for Cost - Reduce TCO by over 40%

Optimized for Cloud – OCI compatible APIs, services, and management tools

**Mission-Critical
Applications**

**Business
Applications**

**Web
Applications**

Develop once, deploy where needed

Private Cloud Appliance X9 Integration and Scalability

Tenancies	Up to 8
Services Compute shapes Storage Containers Network	Fixed VM Shapes Block, File, Object VCN, Gateways
Fault Domains	3
Usable CPU Cores	180 to 1080
Service Enclave - Servers	3
Customer Enclave - Servers	3 to 18
Storage Capacity	180 TB to 8.4 PB

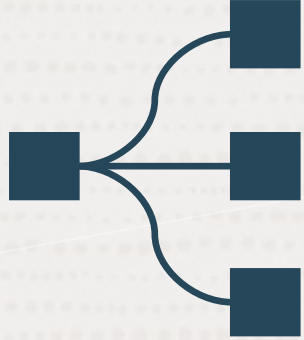

Oracle Cloud Native Environment on PCA X9

Oracle Private Cloud Appliance Cloud Native Capabilities

**Preconfigured
VM/Container
Infrastructure**

Provisioning

**Kubernetes
Orchestration &
Management**

Runtime

**Observability &
Analysis**

Oracle meets you where you are with a distributed cloud strategy

Multicloud

Our products work with your other providers

Public cloud

Access OCI cloud services from 40 global regions

Hybrid cloud

We bring cloud services to you

Dedicated cloud

A cloud just for you

OCI's hybrid cloud services

- Exadata Cloud@Customer
- Customer sites in over 60 countries
- Compute Cloud@Customer
- OCI Extension to customer's data center

- Available early CY2023

RESOURCES

- Cloud-Ready Infrastructure Blog - [link](#)

Oracle Compute Cloud @ Customer
Extend Oracle Cloud (OCI) to secure customer applications and data behind customer's firewall

OCI extension to customer's data center

- Provides customers control over location of services, applications, and data
- Integrated with customer's OCI tenancy, Identity and Access management
- Uses OCI Console, OCI APIs, CLI, SDK, UI, Application images and OKIT
- Same consumption-based pricing for compute and storage as OCI
- Cloud Operations delivered from OCI

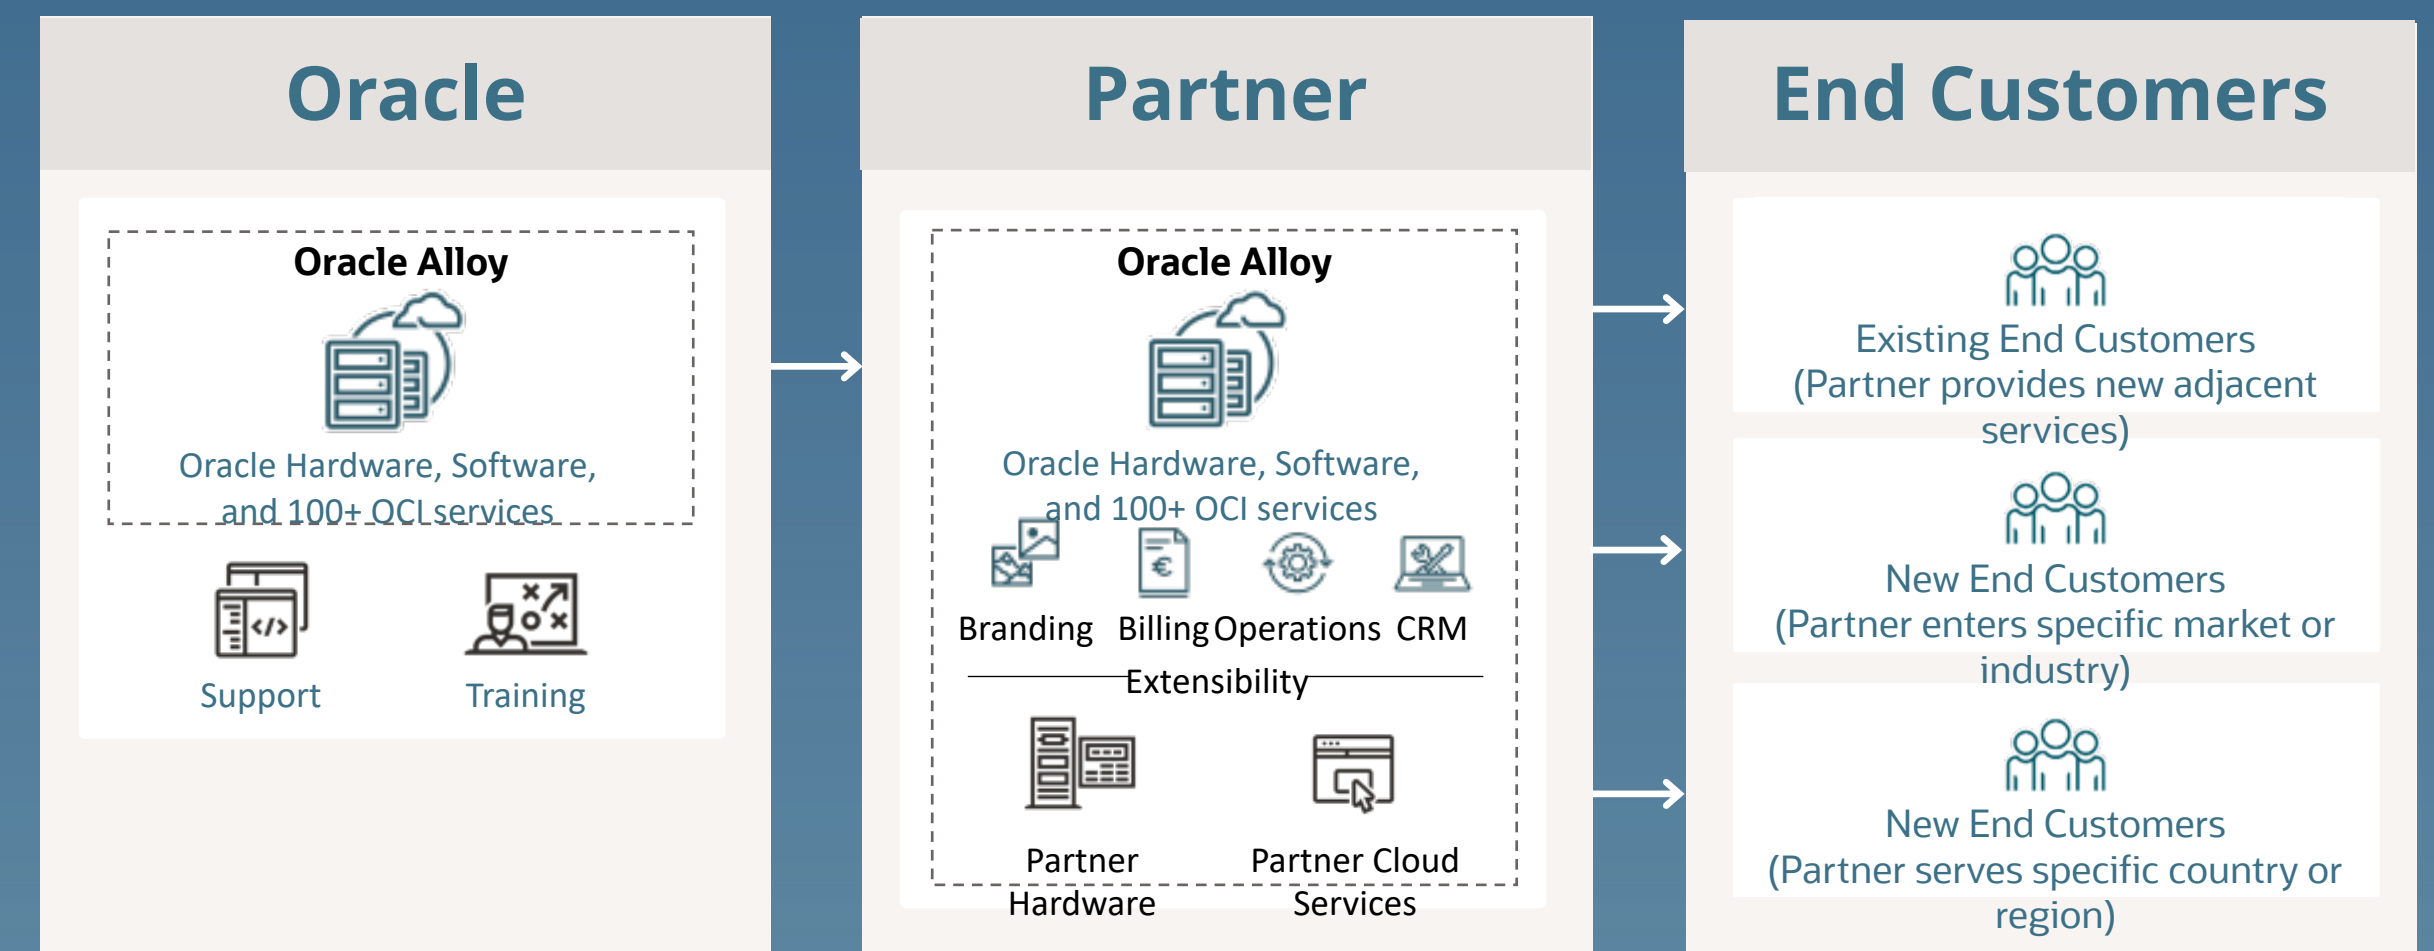

Transparent hybrid cloud

- Partition workloads between private and public cloud
- OCI as target for backup and disaster recovery

OCI's dedicated cloud services

- Oracle Alloy
- New cloud infrastructure platform that enables service providers, integrators, ISVs, to become cloud providers.
- Offer a full set of cloud services, brand and tailor the experience to meet the specific needs of markets and industry

RESOURCES

- [Press Release for Oracle Alloy](#)
- [Oracle Alloy page](#)
- Blog: [Announcing Oracle Alloy - The power of the cloud in your hands](#)

OCI's dedicated cloud services

- OCI Dedicated Region

- Oracle Cloud Infrastructure (OCI) Dedicated Region is a complete OCI cloud region in your data center that offers the agility, scalability, and economics of OCI public cloud.
 - In production with Oman (1 region) and NRI (2 regions)
 - Customer announcements this year from Vodafone, NEOM, and others
 - Earlier this year: Now with smaller footprint & lower commitment
